

# FLYWHEEL POSITIONING SHIM

## MASTER APPLICATION CHART

The Teckpak/Fitzall Flywheel Shim restores clutch pedal height by compensating for the metal removed during flywheel resurfacing and clutch wear & tear. Most Flywheel Shims are available in thicknesses of .025", .050" and .089".

Shims install in seconds. Bolt up between the crankshaft and flywheel with the original bolts! Need no linkage modifications! Shims have break-away tabs for multi-fit applications.

NOTES: (1) READ NOTES PROVIDED WITHIN THE CHARTS. (2) LAST 2 DIGITS OF NUMBER REPRESENTS THE THICKNESS OF THE SHIM. EXAMPLE: SF46850-B WOULD BE .050" THICK AND SG62889-B WOULD BE .089" THICK. (3) "-B" AT END OF PART# JUST MEANS THE SHIM HAS BEEN REVISED.
